ABSTRACT

This guide was developed to assist home economics teachers in implementing the Missouri Vocational Instructional Management System in a housing, home furnishings, and equipment semester course. It contains a minimum of two performance objectives developed and validated for each competency by teachers with expertise in the area of housing, home furnishings, and equipment; in addition one criterion-referenced test item is developed and validated for each performance objective. Each performance objective consists of a given, a task, and criteria for successful completion of the task. Test item formats include true/false, multiple choice, and matching; answers are provided. Performance objectives and test items are provided for the following competencies: analyzing living space and human needs; analyzing legal and financial aspects of housing; analyzing housing alternatives; identifying housing exteriors and maintenance requirements; evaluating structural aspects of housing; using designing fundamentals; analyzing building style and available space; furnishing a home; selecting surface area coverings; selecting window treatments; selecting accessories; selecting household equipment; maintaining a safe and secure environment; recognizing careers in housing and home management; identifying types of small businesses; and developing leadership through Future Homemakers of America. A 13-item resource list also is included. (KC)

FOREWORD

Future planning is a basic necessity in the world of education; we are continually seeking ways to improve the quality of education and training. We are dedicated to the process of helping administrators, educators, and students answer the needs of a constantly changing, fast-paced society.

The Vocational Instructional Management System (VIMS) has become Missouri's framework for competency-based instruction. It provides a practical framework that can help teachers and administrators manage the instructional process and evaluate their programs more efficiently to assure maximum productivity and accountability.

The Competency-Based Scope and Sequence for Vocational Home Economics Programs in Missouri, 1987, is a valuable tool in implementing VIMS into the home economics curriculum at the local level. It includes competencies for the Housing, Home Furnishings and Equipment semester course which were derived from the duties and tasks of the Missouri homemaker and identified and validated by home economics teachers and subject matter specialists.

To further assist home economics teachers in implementing VIMS into the Housing, Home Furnishings and Equipment semester course, a minimum of two performance objectives have been developed and validated for each competency by teachers with expertise in the area of housing, home furnishings and equipment. One criterion-referenced test item has been developed and validated for each performance objective. The development of performance objectives and criterion-referenced test items will facilitate the teacher's ability to recognize the student's mastery of competencies for Housing, Home Furnishings and Equipment.

Competency:

Duty Area: A Analyzing Living Space and Human Needs
Task: 3 Describe how housing preferences change with
 the life cycle

Performance Objective:

Given: Given a case study,

Task: the student describes housing needs in accordance
 with a particular stage in the life cycle

Criteria: based on satisfactory completion of assignment
 sheet(s), job sheet(s), and/or test items.

Criterion-Referenced Test Item:

Brad and Jill have been living in a one-bedroom apartment since they were married. The couple is now expecting a baby. Which is the most pressing housing need of an expectant couple?

- a. * space
- b. social interaction
- c. mobility
- d. privacy

(NOTE: * represents correct response)

HOUSING, HOME FURNISHINGS AND EQUIPMENT

Competency:

Duty Area: B Analyzing Legal and Financial Aspects of
 Housing

Task: 1 Determine economic priorities in housing
 affordability

Performance Objective:

Given: Given a situation,

Task: the student determines housing affordability

Criteria: based on satisfactory completion of assignment
 sheet(s), job sheet(s), and/or test items.

Criterion-Referenced Test Item:

What type of housing meets the needs of most single persons
attending college?

- a. mobile home, owner

Task: 2 Apply principles of design

Performance Objective:

Given: Given examples,

Task: the student classifies principles of design

Criteria: based on satisfactory completion of assignment sheet(s), job sheet(s), and/or test items.

Criterion-Referenced Test Item:

Match each principle of design with the correct definition.

DEFINITIONS

- c 1. unequal objects placed at unequal distances from a center point
- d 2. consistent use of color, line, form, or texture in a pattern
- f 3. similar or identical objects placed on each side of a center point
- b 4. causes an area to become a focal point
- h 5. relationship of size and shape of objects or parts of objects to one another and the design as a whole
- a 6. feeling of rest or equilibrium

PRINCIPLES OF DESIGN

- a. balance
- b. emphasis
- c. asymmetrical balance
- d. rhythm
- e. variety
- f. symmetrical balance
- g. radiation
- h. proportion
